

## Rotary actuators for ball valves

**GMA..9E**

**for ball valves VAI61.. / VBI61.. and VAI60.. / VBI60..**

AC 24 V / DC 24...48 V / AC 230 V

- Electromotive rotary actuators with spring return for emergency position
- For 2-position, 3-position, and modulating control
- Pre-wired with 0.9 m long connection cables

### Remarks

This data sheet provides a brief overview of these rotary actuators. Please refer to the Technical Basics in document Z4614en for a detailed description as well as information on safety, engineering notes, mounting and commissioning.

### Use

- For 2-port and 3-port threaded control ball valves from DN15 to DN50
- For open/close ball valves 2-port and changeover ball valves 3-port, internally threaded connections DN15 to DN50
- Suitable for use with modulating controllers (DC 0...10 V), 3-position controllers or 2-position controllers
- In plants where the rotary actuator must move to the zero position (emergency position) during power failure

## Type summary

## Functions

Type <sup>1)</sup>	GMA..21.9E	GMA131.9E	GMA161.9E
Control type	2-position control	3-position control	Modulating control
Rotary direction for mounting on ball valve (NC/NO)	NC (normally closed) ball valve	NC (normally closed) ball valve	NC (normally closed) ball valve
	Switch on operating voltage: Actuator opens (counter-clockwise) Switch off operating voltage: Actuator closes with spring (clockwise)	Signal on Y1 – rotation counter-clockwise – ball valve opens Signal on Y2 – rotation clockwise – ball valve closes	0...10 V “counter-clockwise” Flow = 0% at Y = 0 V Flow = 100% at Y = 10 V
	See the mounting instructions M4658 for other switchings.		
Emergency position (Spring return)	On power failure or when the operating voltage is switched off, the spring moves the ball valve to its mechanical zero position.		
Position indication: Mechanical	Rotary angle position indication with manual lever as position indicator.		
Position indication: Electrical			Output voltage U = DC 0...10 V is generated proportional to the rotary angle.
Manual adjustment	– Without voltage supplied, the rotary actuator can be rotated and fixed in any position using the supplied Allen key. – The rotary actuator returns to the zero position (actuator closed) if mechanically unlocked via Allen key or via short-term voltage supply.		

<sup>1)</sup> When combining GMA..1E and ASK77.2: You must consult the mounting instructions M4696 (74 319 0648 0)!

## Equipment combinations

The rotary actuators are suitable for operation of the following Siemens ball valves:

## Notes

For more details about these rotary actuators see document Z4614.

## Mounting

Both ball valve and rotary actuator can easily be assembled at the mounting location. Neither special tools nor adjustments are required.

The rotary actuator is supplied with Mounting Instructions M4658 (74 319 0653 0)

The ball valve:

– VAI61.. / VBI61.. is supplied with Mounting Instructions M4211 (74 319 0647 0),

the ball valve:

– VAI60.. / VBI60.. is supplied with Mounting Instructions M4213 (74 319 0883 0).

## Orientation

## Commissioning

When commissioning the system, check wiring and the function of the rotary actuator.
