

RDH10RF

RCR10/433

Wireless room temperature controller with LCD

RDH10RF/SET

Non-programmable, for heating or cooling systems

- Operating modes: Automatic, Comfort, Energy Saving, and Frost Protection
- LCD-Display 50 x 45 (W x H)
- RDH10RF transmitter, battery-powered
- RCR10/433 receiver, mains powered
- Communication of the set is bonded ex factory

Use

The RDH10RF is used to control the room temperature in heating or cooling systems.

Typical applications:

- Homes
- Residential buildings
- Schools
- Offices

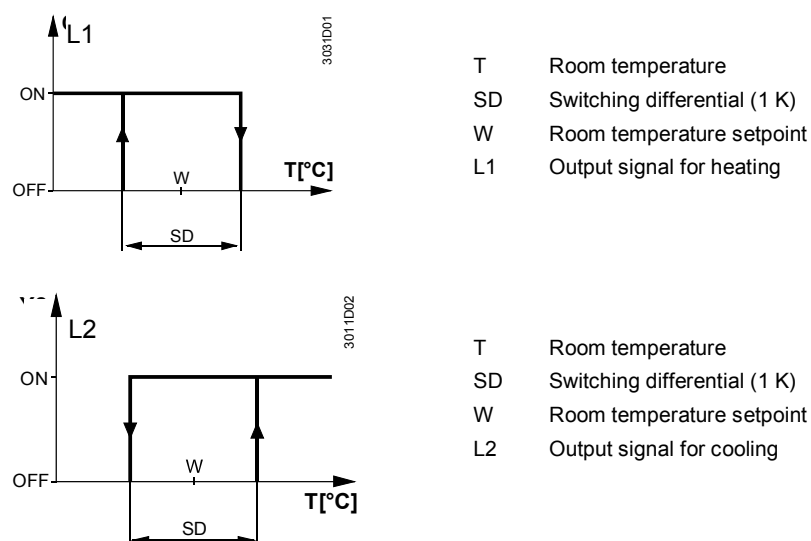

The controller can be used together with the following equipment:

- Thermal valves or zone valves
- Combi boilers
- Gas or oil burners
- Fans
- Pumps

Functions

The controller acquires the room temperature with its integrated sensor.

Function diagram

Temperature sensor

The RDH10RF provides room temperature control only.

Display

The digital display displays the actual room temperature and the comfort temperature setpoint. The triangle symbol appears when the heating output is active.

Backup

Setpoints and information required for operating mode changeover are retained when exchanging batteries. The values must be checked though.

Ordering

Please provide the name and product number when ordering: Room temperature controller RDH10RF/SET.

Valves and actuators are to be ordered as separate items.

Equipment combinations

| Type of unit | Product number | Data sheet ^{*)} |
|---|----------------------|--------------------------|
| Electromotoric actuator | SFA21... | 4863 |
| Electrothermal actuator (for radiator valves) | STA21... | 4877 |
| Electrothermal actuator (for small valves 2.5 mm) | STP21... | 4878 |
| 2- or 3-port zone valve | MXI/MVI421... | 4867 |
| Electromotoric actuator for zone valves V..146.. | SUA21 | 4830 |
| Electric actuator | SUA11/22 | 4832 |
| Air damper actuator | GDB... | 4624 |
| Air damper actuator | GSD/GQD... | 4606 |
| Air damper actuator | GXD... | 4622 |

^{*)} The documents can be downloaded from <http://siemens.com/bt/download>.

The controller consists of 4 parts:

- Plastic housing with digital display accommodating the electronics, operating elements and built-in room temperature sensor
- Baseplate (mounting base)
- Removable battery compartment
- Fold-out stand

The housing engages in the baseplate and snaps on. There is a reset button on the rear of the unit.

Key

- 1 Room temperature display in °C
- 2 Indicates a heat request
- 3 Temperature setting knob
- 4 Battery compartment
- 5 Comfort temperature setpoint
- 6 **RF TEST** Indicates RF signal test
- 7 Indicates low battery power; replace batteries

The RCR10/433 receiver is located in a plastic housing with LEDs and buttons.

The RDH10RF is located in a plastic housing. Two buttons are visible on the rear side when removing the baseplate.

Mount the room temperature controller in a location where the air temperature can be measured as accurately as possible without being adversely affected by direct solar radiation or other sources of heat or cooling.

The controller is delivered with a fold-out stand and may be used as a "mobile" device (Note: Pay attention to mounting location).

Mounting height is approximately 1.5 m above the floor.

The unit can be fitted to a recessed conduit box.

Mounting, installation and commissioning

Fix the baseplate prior to mounting the controller. The receiver does not require a baseplate. Connect the electrical connections and fit and secure the receiver in compliance with local regulations (also refer to the separate mounting instructions). Mount the controller on a flat wall.

If there are thermostatic radiator valves in the reference room, set them to their fully open position.

For commissioning please refer to the Operating Instruction CE1B3070xx

Maintenance

Controller and receiver are maintenance-free except for the controller battery.

Change of batteries

If battery symbol  appears, the batteries are almost empty and must be replaced.

Reset

Simultaneously press the TEST and LEARN buttons on the rear side of the controller to reset it (reset function).

Simultaneously press the OVERRIDE and LEARN buttons to reset the receiver (reset function).

All individual settings are reset to the default values.

OVERRIDE

Override allows for temporarily overwriting the active value from the sender. Override responds differently depending on the radio connection (normal or fault).

Example A: Normal connection between sender and recipient

Press the OVERRIDE button to overwrite the value for ca. 14 minutes. The value then returns to the setpoint.

Example B: Faulty connection between sender and recipient

Press the OVERRIDE button to permanently overwrite the value. The value returns to the setpoint after the connection between sender and recipient works again.

RF LED

| RF state | RF LED |
|------------------------------------|--|
| Power up (First 5 seconds) | Flash RED + GREEN (Amber) (5 seconds) |
| Power up (After 5 seconds) | RED |
| Press OVERRIDE switch | Flash RED + GREEN (Amber) (5 seconds) |
| Learning period | No LED |
| Software reset | RED |
| RF receive | GREEN |
| No RF within last 25 minutes | RED |
| Manual override (RF receive) | Flash GREEN |
| Manual override (No RF receive) | Flash RED |

Relay LED

| Relay state | Relay LED |
|----------------------------------|--------------|
| From OUT to ON (First 5 seconds) | Flash YELLOW |
| ON | YELLOW |
| From ON to OFF (After 5 seconds) | Flash YELLOW |
| OFF | OFF |

Disposal

The devices are considered electronics devices for disposal in term of European Directive 2012/19/EU and may not be disposed of as domestic waste.

- Dispose of the device via the channels provided for this purpose
- Comply with all local and currently applicable laws and regulations.
- Dispose of empty batteries at designated collection points.

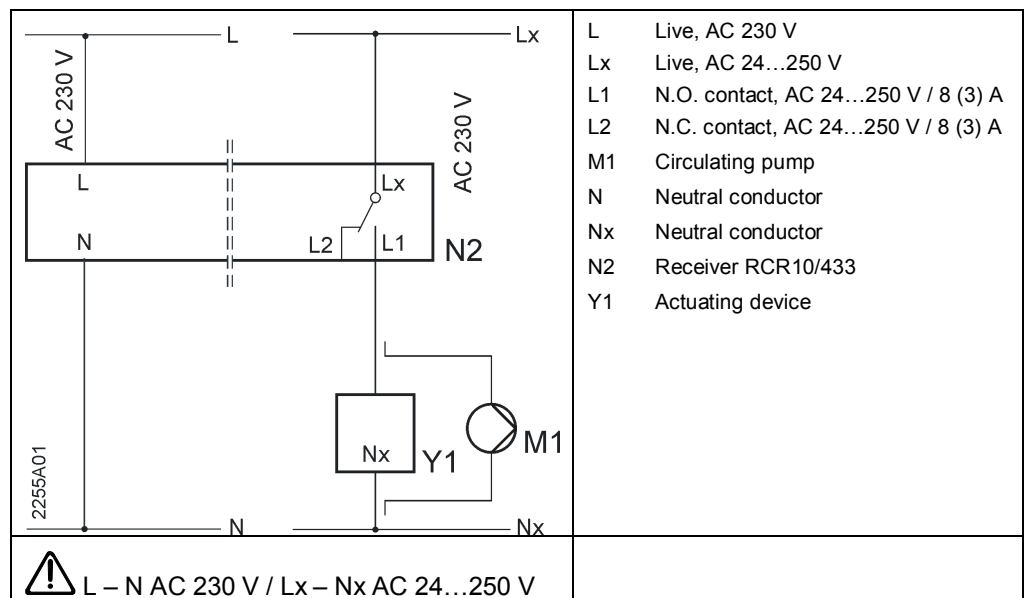

| Technical data | | |
|--------------------------|--|--|
| Power supply | Operating voltage | DC 3 V (2 x 1.5 V AA alkaline batteries) |
